Thermokote

Associated with High Temperatures

HIGH TEMPERATURE COATINGS

The corrosion protection of high heat areas associated with high temperature is the perennial problem to the Industry. Monarch ThermoKote range High Temperature Coatings protect the steel structural against atmospheric alkaline corrosion and under insulation corrosion (CUI) up to 810°C (1490°F). The excellent resistance to thermal shock as a result of rapid temperature cycling, extend life expectancy of assets.

Applications: Chimney, Oven, DG Set, Exhaust Stack, High Heat Areas, Corrosion Under Insulation.
