### INCREASE COMFORT LIVING CONDITONS USING HEAT REFLECTIVE COATINGS

### THE PROBLEM

Due to continuous direct attack of sun rays/UV Rays the heated terrace produce warm humidity/temperature/ hot climate inside the living rooms.

### MONARCH's SOLUTION

Monarch OzoProtect Heat reflective coating is applied two coat with brush/spray gun. After coating room heat reduced up to 60%, reflecting back the sun heat rays effectively to atmosphere.

The uncoated roof temperature is 48 0 C, after coating the roof temperature is 35 0 C

The coating shall provide additional design life of roofs, protecting from atmospheric hazards.

### CUSTOMER REFERENCE

- ❖ Customer : Mr Muthukumaran
- ❖ Industry : Residential House ,Theni
- ❖ Contact Pers/Desg : House Owner
- ❖ Ref W/O No. : No HR-002 dated 28 Apr 2014 .
